

Certificate II in Competitive Manufacturing MSA21108

This is a nationally accredited Australian qualification

This Qualification is suitable for:

People working in manufacturing

Production support workers

Outline of the Qualification

The Certificate II in Competitive Manufacturing is intended for entry level and existing production workers who undertake vital production or support roles directly related to manufacturing products.

The production worker would apply a breadth and depth of knowledge to a defined range of situations and would be expected to apply this knowledge to solve a defined range of problems by applying known solutions to a limited range of predictable problems.
